

 [MUTHUKUMAR73737](#) / [E-shopping-Front-end-](#)

Quick setup — if you've done this kind of thing before

 Set up in Desktop or [HTTPS](#) [SSH](#) <https://github.com/MUTHUKUMAR73737/E-shopping-Front-end-.git>

Get started by [creating a new file](#) or [uploading an existing file](#). We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

...or create a new repository on the command line

```
echo "# E-shopping-Front-end-" >> README.md
git init
git add README.md
git commit -m "first commit"
git remote add origin https://github.com/MUTHUKUMAR73737/E-shopping-Front-end-.git
git push -u origin master
```

...or push an existing repository from the command line

```
git remote add origin https://github.com/MUTHUKUMAR73737/E-shopping-Front-end-.git
git push -u origin master
```

...or import code from another repository

You can initialize this repository with code from a Subversion, Mercurial, or TFS project.
